

Respected BDG, Teachers, and my dear friends,

I want to thank all the globsyn friends, teachers and BDG as they help me to see my career in a different way. It's difficult for us who are very fickle in nature about anything. It was a lifetime experience and good learning platform from where you can learn to see yourself as a totally different human being. I will send some of the blog on finance management soon to help my junior to know about the current financial environment of Indian companies.
